

MUHAMMAD SHAHAB UD DIN GOHAR

Full-Stack AI Engineer | AI Agents, RAG & CRM Automation

Islamabad, Pakistan · shahab.developer.work@gmail.com · +92 304 9065702

shahabgohar.dev · github.com/shahabgohar · linkedin.com/in/shahabgohar

Full-stack engineer (5+ years) shipping AI systems that reach production: AI agents, RAG/LLM applications, and CRM automation. Author of SuiteCRM AI plugins live on the SuiteCRM Store. 5.0★ across 36 client reviews; clients in 10 countries including the US, UK, Germany, Spain, and Canada.

SELECTED WORK & PROOF

- **PTC Content Studio (AI content pipeline):** full-stack web app that turns campaign performance data into clinician-approved, SEO-optimized health articles through a multi-step LLM pipeline (FastAPI, Vue 3, PostgreSQL, LangChain Deep Agents). Human approval gates, YMYL safety auditing, a provider-agnostic engine (Anthropic/Gemini), per-run cost ceilings, and live keyword metrics (DataForSEO).
- **AI Dashlet Generator (SuiteCRM Store):** plain-English questions → live CRM charts, with transparent SQL generation and threshold lines. LLM-to-SQL product used by real businesses.
- **Business Card Reader plugin:** instant AI lead capture and enrichment from card photos into SuiteCRM.
- **Enterprise CRM migration:** moved a European textile manufacturer to SuiteCRM 8.10.1 on Docker Compose — Google SSO, auto-provisioned calendar sync, 6-language localization. Case study: shahabgohar.dev/blogs.
- **AI calling-bot management portal on SuiteCRM:** campaign management with multi-server orchestration (restart and configuration controls) and AI voice agents — per-agent voice generation, call scripts and noise profiles.
- Mautic → SuiteCRM lead-sync integration for a US CRM partner reselling white-labelled CRM; quote → order → invoice automation for B2B sales teams.

EXPERIENCE

Full Stack Engineer — Esper Solutions, Islamabad

Aug 2024 – Present

- Built 3 SuiteCRM plugins — AI Dashlet Generator and Business Card Reader (both live on the SuiteCRM Store) plus a Draft Extension; upgrade-safe customizations and Angular extensions raised user efficiency ~15%.
- Built a Vue front end with a Python FastAPI backend for a performance-marketing call-tracking and analytics platform (real-time campaign and call-flow dashboards).
- Revamped legacy admin portals (Alpine.js/jQuery), optimized the company Android app (ViewPager2), and automated internal workflows.
- Database optimization, automated backup workflows, error reporting and system-degradation monitoring; Ansible-based ops; mentored junior engineers.

Freelance Software Developer — CTO GmbH, Stuttgart, Germany (remote)

May 2023 – Feb 2024

- Vue, Nuxt and TypeScript development; built Ionic hybrid mobile apps for production clients.

Full Stack Engineer — Motocle, Fukuoka, Japan (remote)

Nov 2021 – Apr 2023

- Built pixel-perfect Vue/Nuxt UIs, reusable component libraries, and Laravel REST APIs with cron jobs across 5 projects (teams of 4–8), spanning B2C products and internal corporate tools.

Freelance Software Engineer — Fiverr (@shahabg123)

2018 – Present

- 5.0★ rating, 36 lifetime reviews. CRM customization, AI agents and business automation for clients across 10 countries.

Database Developer Intern — Fatima Sugar Mills, Multan

Jul – Aug 2019

- SQL, PL/SQL and Oracle BI Publisher reporting.

SKILLS

- **AI Engineering:** AI agents, RAG pipelines, LLM app development, prompt engineering, AI chatbots, LLM-to-SQL
- **Backend:** PHP (Laravel, SuiteCRM), Python (Django, FastAPI), Node.js, REST APIs, MySQL, SQL/PL-SQL
- **Frontend:** Vue, Nuxt, Angular, Alpine.js, TypeScript, Tailwind, SASS
- **Ops:** Docker, Ansible, AWS, Git, automated backups, monitoring & alerting

EDUCATION & CERTIFICATIONS

B.Sc. Software Engineering — UET Taxila (GPA 3.3/4.0)

2017 – 2021

- Coursework incl. Machine Learning & Deep Learning. Winner, Air University hackathon 2019 (robotic plant-seeding platform).
- **AWS Certified Cloud Practitioner** (2022) · Languages: English, Urdu, Hindi, Spanish
