

Muhammad Shahab Ud Din Gohar

FULL-STACK AI ENGINEER • AI AGENTS, RAG & LLM APPLICATIONS

Islamabad, Pakistan | shahab@shahabgohar.dev | +92 304 9065702 | shahabgohar.dev | github.com/shahabgohar | linkedin.com/in/shahabgohardev

SKILLS

AI ENGINEERING

AI agents, RAG pipelines, LLM apps, prompt engineering, LLM-to-SQL, voice AI

BACKEND

Python (FastAPI, Django), PHP (Laravel, SuiteCRM), Node.js, REST APIs, PostgreSQL, MySQL, SQL/PL-SQL

FRONTEND

Vue 3, Nuxt, Angular, TypeScript, Alpine.js, Tailwind, SASS

INFRA & OPS

Docker, Ansible, AWS, Git, CI/CD, self-hosted GPU (vLLM), monitoring & alerting

AI-ASSISTED DEVELOPMENT

Claude Code & agentic coding workflows, spec-driven prompting, AI code review; ship senior-level output fast

CLIENT & SOLUTION DESIGN

Business-process discovery, solution design, demos & stakeholder buy-in, client onboarding

EDUCATION

B.Sc. Software Engineering

UET Taxila • 2017–2021 • GPA 3.3/4.0

Coursework in Machine Learning & Deep Learning. Winner, Air University Hackathon 2019 (robotic plant-seeding platform).

CERTIFICATIONS

■ AWS Certified Cloud Practitioner (2022)

LANGUAGES

English • Urdu • Hindi

AVAILABLE FOR

AI Engineer • Full-Stack

Remote, contract or full-time. Fast turnaround, working demos over promises.

PROFILE

Full-stack engineer with **5+ years** building AI systems that reach production — **AI agents, RAG/LLM applications, and voice AI**, backed by strong full-stack (Python/FastAPI, Vue 3) and CRM-automation depth. I work directly with clients to understand their business process, design the solution around it, and own it end to end, from LLM extraction engines and safety gating to the dashboards teams actually use. Daily driver of **Claude Code and agentic AI coding workflows** to ship at well beyond solo pace. Author of AI plugins live on the SuiteCRM Store.

SELECTED AI & ENGINEERING PROJECTS

AI Lead-Automation Platform

WhatsApp → CRM, powered by LLM extraction

Fully-automated system that reads inbound WhatsApp conversations and turns them into structured, deduplicated CRM deals for a private healthcare provider — no human in the loop. A provider-agnostic LLM engine extracts 13 fields per chat; a Vue 3 dashboard adds a "why the AI decided" inspector and a fail-closed live/dry-run write gate. **0 unintended writes against a live production CRM.**

FastAPI Vue 3 LiteLLM PostgreSQL HubSpot

Payment Reconciliation & Invoicing Automation

Calendar bookings → Stripe payments → Xero invoices

Billing backbone for a multi-practitioner therapy clinic across two countries: mirrors practitioners' Google Calendars, matches every booking to its Stripe payment across accounts and currencies, and auto-generates Xero invoices, replacing a manual spreadsheet process. Human-in-the-loop review for ambiguous cases. **100+ invoices auto-generated; 1,500+ tests.**

FastAPI Async SQLAlchemy PostgreSQL Vue 3 + TypeScript Stripe Xero Google APIs

AI Content Pipeline

Campaign data → expert-reviewed articles

Full-stack AI pipeline that turns campaign data into expert-reviewed, SEO-optimized articles, with human approval gates, safety auditing, and per-run cost ceilings. **Agents + RAG running safely in production.**

FastAPI LangChain Vue 3 PostgreSQL

AI Voice-Agent Campaign Portal

Manage AI calling agents on self-hosted open-source models

Built end to end: a portal for AI calling campaigns with multi-server orchestration, restart and config controls, per-agent voices, call scripts and noise profiles, on open-source STT, TTS and LLM models self-hosted in production on Hetzner GPUs.

Vue Python STT / TTS LLMs Hetzner GPU

Enterprise CRM Migration & White-Label Product

Brittle deployment → reproducible, resellable platform

Migrated a European manufacturer to a versioned SuiteCRM 8 platform on Docker Compose (SSO, calendar sync, 6-language localization, one-command ops). Separately re-skinned SuiteCRM 8 with a modern Angular UI into a fully white-labelled product a client now resells. Author of the **AI Dashlet Generator** and **Business Card Reader** plugins on the SuiteCRM Store.

SuiteCRM 8 Docker Angular SSO

EXPERIENCE

AI Engineer (Part-Time) — AmendSolutionz (remote)

2026 – Present

Sole engineer on the company's AI lead-automation system, owning it end to end. Translate business problems into practical AI solutions and present solution demos that address the client's problem to win buy-in and onboard them. Drive architecture, development, deployment, and live production monitoring.

Full Stack Engineer — Esper Solutions, Islamabad

Aug 2024 – Present

Build AI automation and SuiteCRM products — 2 AI plugins live on the SuiteCRM Store, AI voice-agent portals, and a Vue 3 + FastAPI call-tracking analytics platform. Upgrade-safe customizations, Ansible ops, DB tuning, monitoring; mentor juniors.

Freelance Software Developer — CTO GmbH, Stuttgart (remote)

May 2023 – Feb 2024

Vue, Nuxt and TypeScript development; built Ionic hybrid mobile apps for production clients.

Full Stack Engineer — Motocle, Fukuoka, Japan (remote)

Nov 2021 – Apr 2023

Vue/Nuxt UIs, reusable component libraries, and Laravel REST APIs with cron jobs across 5 projects (teams of 4–8).

Freelance Software Engineer — Fiverr (@shahabg123)

2018 – Present

5.0★ rating across 36 reviews. CRM customization, AI agents, and business automation for clients in 10 countries.

Database Developer Intern — Fatima Sugar Mills, Multan

Jul – Aug 2019

SQL, PL/SQL and Oracle BI Publisher reporting.
